Notice of Fee Increase on January 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: none of the prior art either alone or in combination disclose or teach of the claimed combination of limitations to warrant a rejection under 35 USC 102 or 103. Specifically, with respect to independent claim 1, none of the prior art alone or in combination disclose or teach of a projection lens as claimed, specifically wherein the gas chamber is constructed as an at least approximately plane-parallel manipulation chamber located between the lens arrangement and the image plane.

Specifically, with respect to independent claim 2, none of the prior art alone or in combination disclose or teach of a projection lens as claimed, specifically wherein the gas chamber is constructed as an at least approximately plane-parallel manipulation chamber located between the lens arrangement and the image plane.

Specifically, with respect to independent claim 3, none of the prior art alone or in combination disclose or teach of a projection lens as claimed, specifically wherein the gas chamber is constructed as an at least approximately plane-parallel manipulation chamber located between the lens arrangement and the image plane.

Specifically, with respect to independent claim 19, none of the prior art alone or in combination disclose or teach of a system for projection lens as claimed, specifically wherein the gas chamber is a manipulation chamber formed between adjacent plane-parallel optical elements.

Specifically, with respect to independent claim 20, none of the prior art alone or in combination disclose or teach of a system for projection lens as claimed, specifically including an at least approximately plane-parallel manipulable gas interspace, for the purpose of removing field curvature, on a substrate, which is to be exposed, in a sixth optical group.

Specifically, with respect to independent claim 21, none of the prior art alone or in combination disclose or teach of a system for projection lens as claimed, specifically wherein the gas chamber is constructed between adjacent approximately plane-parallel optical elements to form a manipulation chamber.
